

Technical features:

- Water cooled welding torch
- Symmetrical clamping by toggle clamp
- Motor with encoder** : allows for tungsten electrode start-up at all angles and a wide range of diameters
- Axial adjustment of the electrode
- Weight: 8,3Kg (without cables)

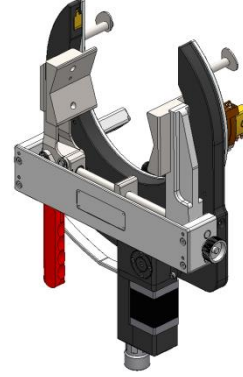

ADVANTAGES

Torch angle adjustment:
welding under flange or
short T angle

Symmetrical clamping
/ Straight motor

Symmetrical clamping
/ Angle transmission
motor

Mechanical profile guide:
Constant arc voltage
